

PATENT**Application # 10/774,718****Attorney Docket # 2003-0029 (1014-058)****AMENDMENTS TO THE CLAIMS**

1. (Currently Amended) A method comprising:
receiving from a user-operated telecommunications device a user-initiated communication to a non-911 communications address;
automatically providing a user with a spoken current location of a user-associated telecommunications device, the user-operated telecommunications device distinct from the user-associated telecommunications device; and
requesting from the user verification of the current location of the user-associated telecommunications device.
2. (Original) The method of claim 1, further comprising:
receiving a communications address of the user-associated telecommunications device.
3. (Original) The method of claim 1, further comprising:
receiving a communications address of the user-associated telecommunications device from the user.
4. (Original) The method of claim 1, further comprising:
receiving at an Internet site a communications address of the user-associated telecommunications device.
5. (Original) The method of claim 1, further comprising:
recording a communications address of the user-associated telecommunications device.
6. (Original) The method of claim 1, further comprising:
receiving information indicative of the current location of the user-associated telecommunications device.

PATENT**Application # 10/774,718****Attorney Docket # 2003-0029 (1014-058)**

7. (Original) The method of claim 1, further comprising:
obtaining information indicative of the current location of the user-associated telecommunications device from an Automatic Location Information database.
8. (Original) The method of claim 1, further comprising:
obtaining information indicative of the current location of the user-associated telecommunications device from a mobile positioning center.
9. (Original) The method of claim 1, further comprising:
obtaining information indicative of the current location of the user-associated telecommunications device from a triangulation source.
10. (Original) The method of claim 1, further comprising:
obtaining information indicative of the current location of the user-associated telecommunications device from a GPS source.
11. (Original) The method of claim 1, further comprising:
obtaining information indicative of the current location of the user-associated telecommunications device from an Emergency Service Message Entity.
12. (Original) The method of claim 1, further comprising:
via wireless packet data, providing to the user-operated telecommunications device information indicative of the current location of the user-associated telecommunications device.
13. (Original) The method of claim 1, further comprising:
providing the user with a communications address to contact to modify information indicative of the current location of the user-associated telecommunications device.
14. (Cancelled).

PATENT**Application # 10/774,718****Attorney Docket # 2003-0029 (1014-058)**

15. (Original) The method of claim 1, wherein the user-initiated communication comprises a telephone call.
16. (Original) The method of claim 1, wherein the spoken current location of the user-associated telecommunications device is provided to the user via text-to-speech conversion.
17. (Original) The method of claim 1, wherein the user-associated telecommunications device is a wireless user-operated telecommunications device.
18. (Original) The method of claim 1, wherein the user-associated telecommunications device is a wireline user-operated telecommunications device.
19. (Currently Amended) A system comprising:
 - means for receiving from a user-operated telecommunications device a user-initiated communication to a non-911 communications address;
 - means for automatically providing a user with a current location of the user-operated telecommunications device, the user-operated telecommunications device distinct from the user-associated telecommunications device; and
 - means for requesting from the user verification of the current location of the user-operated telecommunications device.
20. (Currently Amended) A machine-readable medium storing instructions for activities comprising:
 - receiving from a user-operated telecommunications device a user-initiated communication to a non-911 communications address;

PATENT

Application # 10/774,718

Attorney Docket # 2003-0029 (1014-058)

automatically providing a user with a spoken current location of the user-operated telecommunications device, the user-operated telecommunications device distinct from the user-associated telecommunications device; and

requesting from the user verification of the current location of the user-operated telecommunications device.
